

Jug Bay Wetlands Sanctuary Challenges YOU to

Ready to accept the Challenge?

- Classes that participate in our Waste-Free Lunch Challenge will have their trash and recyclables weighed during their visit to Jug Bay.
- All class weights will be recorded through the season.
- The class with the least amount of waste will win a prize!

The average American school-age child throws away 67 pounds of lunch waste a year. With the population of kids in the US alone accounting for over 70 million, that's over 4.6 billion pounds of waste that could be easily avoided. (EPA).

Waste-free lunches can save you money. Eliminating disposable packaging and single-serving items can save families \$250 a year. (Wastefreelunches.org)

Nature recycles. Shouldn't we?

Visit www.wastefreelunches.org for more information on what you can do at your school or home!
